

// PROFILE & OBJECTIVE

Resourceful, creative and approachable Digital Designer seeking to be part of an equally passionate team of like-minded, innovative individuals. With a diverse background of logo, print, web, typography and multimedia design, an expertise of the most favored design-related software and a fair amount of Project Management-related experience, my immediate goal is to obtain full-time employment as a Digital, Visual, UX/UI, Interactive Designer or Production or Technical Artist.

ADAM ROYER

// DIGITAL DESIGNER

// WORK EXPERIENCE

March 2019 – April 2021

Custom Graphic Services // Salem/Portland, OR

Signage and Vinyl Graphics Installer

Install small- to large-scale professionally-produced signage and graphics for top companies such as Nike, Columbia Sportswear, Danner, Adidas, University of Oregon, Goodwill, PGE, Levi's, Portland Timbers, Amazon, Oregon State Police, New Seasons, and more. Applications consist of new construction, office space, full wall and window coverings, vehicle wraps, storefront window displays, and much more.

October 2006 – November 2018

liveBooks (WeddingWire, Inc.) // Chevy Chase, MD (remote)

Web and Graphic Designer + Project Manager

Operated as Sr. Designer while simultaneously managing multiple small- to large-sized internal and client-facing projects. Personally worked with thousands of individual clients of various types (photographers, architects, interior designers, etc.) to discuss, strategize and execute custom designs and enhancements for their responsive websites. Managed projects included corporate website launch/updates/upkeep, monthly newsletter bulletins, promotions and other email communication designs. In a fast-paced, quick-turnaround environment, it was essential to be clear, concise and organized, all while delivering dynamic, high quality work in a timely manner. Joined forces with the Development team to brainstorm, plan, create assets and occasionally assist with implementing upgrades to the software platform. Managed another Designer due to the high demand of design-related work.

September 2005 – October 2006

Ignight Health // Irvine, CA

Senior Flash Designer

Closely collaborated with both the Design and Development teams to create some of the most impactful, highly-dynamic websites, presentations and applications in the health-related industry. Brought the Designers' imagination to life while also getting their designs to the Developers' back-end databases.
