

// PROFILE & OBJECTIVE

Resourceful, creative and experienced Digital Designer seeking to be part of an equally passionate team of like-minded, innovative individuals. With a diverse background of logo, print, web, typography and multimedia design, an expertise of the most favored design-related software and a fair amount of Project Management experience, my immediate goal is to obtain full-time employment or a long-term contract assignment as a Digital, Visual, UX/UI, Interactive Designer or Production/Technical Artist.

ADAM ROYER

// DIGITAL DESIGNER

// WORK EXPERIENCE

March 2019 – Current

Custom Graphic Services // Salem/Portland, OR

Signage and Vinyl Graphics Installer

Install small- to large-scale professionally-produced signage and graphics for high-profile companies such as Nike, Columbia Sportswear, Danner, Adidas, University of Oregon, Goodwill, PGE, Levi's, Portland Timbers, Amazon, Oregon State Police, New Seasons, amongst many others. Application environments consist of new construction, office spaces, stadiums, full wall and window coverings, vehicle decals and full wraps, storefront window displays, and much more.

October 2006 – November 2018

liveBooks (WeddingWire, Inc.) // Chevy Chase, MD (remote)

Web and Graphic Designer + Project Manager

Operated as Sr. Designer while simultaneously managing multiple small- to large-sized internal and client-facing projects. Personally worked with thousands of individual clients of various types (photographers, architects, interior designers, creative directors, etc.) on a one-on-one basis to discuss, strategize and execute custom designs and enhancements for their responsive websites. Managed projects included corporate website launch/updates/upkeep, monthly newsletter bulletins, promotions and other email communication designs. In a fast-paced, quick-turnaround environment, it was essential to be clear, concise and organized, all while delivering dynamic, high quality work in a timely manner. Joined forces with the Development team to brainstorm, plan, create assets and occasionally assist with implementing upgrades to the software platform. Managed a second Designer due to the high volume of design-related work.

September 2005 – October 2006

Ignite Health // Irvine, CA

Senior Flash Designer

Closely collaborated with both the Design and Development teams to create some of the most impactful, highly-dynamic websites, presentations and applications in the health-related industry. Brought the Designers' imagination to life while also getting their designs to the Developers' back-end databases.
