

THE CULTURAL SANCTUARIES FOUNDATION

Protecting the Protectors

We are on the front cover of TIME Magazine!

We are honoured that our Eagle Hunter Cultural Center in Mongolia has been included in TIME Magazine's 2025 list of the World's Greatest Places, just released and with one of Chris' images on the front cover. With TIME's multi-platform audience reaching over 120 million, this level of publicity is potentially going to be transformational for the Center, for the eagle hunting community that it is designed to support and for Cultural Sanctuaries itself too. We are over the moon. With our Cultural Center in Bhutan thriving, phase one of our Marquesas project completed, our language recording studio in Alert Bay Canada opening imminently, our Casa de Cultura Mazahua in Mexico under construction and more cultural center projects in development in each of Papua New Guinea, Costa Rica, Peru, Chile, Kenya and Ecuador, we have much to celebrate. Thank you all for your continued support and interest in CSF's work!
