### Giclee Print Order Standard Turnaround Times

I process all giclee orders as quickly as possible, while still working to achieve a high level of detail and quality in my work. From the time I receive a digital image, I work to process a reasonably sized order in 3-5 business days. Each order takes editing, proofing, formatting, cutting and packaging. Please allow at least 2 business days for you to receive/review your mailed proof and another 2-3 business days for the arranged delivery/shipment of the final print. Handcrafted wood and stretched canvas will take longer to construct and can be quoted individually. If you need a rushed order (1-2 day pickup), I will have to assess if I could get the project done in this amount of time individually and charge an additional \$40.00 for expedited delivery, Although making a high quality giclee print may take a little more time than printing a standard color copy, the end result from an experienced printer is well worth the wait!
