GREEN SCREEN PORTRAITS

"Environmental portraits" we can shoot on-site or at my studio 15 minutes from downtown.

- We shoot against a green screen, and
- remove the green and place a location background into the image.
- No need to worry about booking a visually appealing room,
or whether there's enough light!
- We can shoot any time of day.
- Crops are flexible.
- Note: Just remember subjects must AVOID WEARING GREEN.

Disclaimer: A few of the following images include proprietary backgrounds reserved for use in portraits of employees of the organizations where the backgrounds were shot.
